

HSBA LN

As of 11/24/2022

HSBC Holdings PLC

HSBC is among the top-five banks in the world and a leading international banking group in Asia (excluding Japan), with a strong presence in the Middle East, North and South America, and the UK. HSBC's regional banking franchises largely focuses on retail banking and consumer finance. Adj. PBT rose 18% y/y to USD6.5bn, led mainly by solid NII, despite booking an ECL charge of USD1.1bn (vs a USD561m release in Q3 2021). ECL more than doubled q/q, due to its China real estate exposure, economic uncertainty and inflation risk in the UK. HSBC kept its guidance for credit cost of 30bps for 2022 and 30bps-40bps for 2023. Adj. revenues grew 28% y/y (+13% q/q), led by a 40% y/y rise in NII and 13% y/y growth in non-NII. NIM jumped a solid 22bps q/q to 1.57% (vs +9bps q/q in Q2), with the UK and Asia rising strongly by 22bps q/q and 33bps q/q, respectively. The NIM uptrend should continue over the next few quarters, as the group has ca one-third of assets in the UK, where the base rate has increased more than 200bps year-to-date. For Hong Kong, the interbank rate has seen a sharp hike. HSBC's own sensitivity analysis shows that the bank has the largest interest rate to earnings sensitivity in GBP, followed by HKD and USD. Adj. costs rose 5% y/y. 9M RoTE reached an annualised 9.2%. The CET1 ratio fell 20bps q/q to 13.4%. Adj. PBT grew (y/y) across regions, with growth of 17% in Europe to USD1.4bn, 13% in Asia to USD3.7bn (Hong Kong: +1% y/y), 39% in MENA, 38% in North America, and 31% in Latin America. Adj. PBT rose strongly at WPB (+35% y/y to USD2.4bn), followed by CB (+17% y/y to USD2.1bn) and GBM (+15% y/y to USD1.5bn).
